ESG RE

About us

We are sustainability

Our company's doctrine of 21st century value creation is rooted in the notion that attributing equal precedence to economic profit, societal wellbeing, and environmentalism results in triple bottom line performance, meaningful societal inclusiveness, and positively impacted communities. There is no denying the immediate action we must take to transition our way of living through our behavioral choices and a company's responsibility to society, the environment and current generations. Our philosophy is embedded in our DNA because ESG is designed into all our governance decisions, symbolized by our brand, and communicated by ours and our clients sustainability performance. It goes without saying that our products are in a league of their own because people, nature, and society is our best client and we are their best customer. Welcome to ESG RE – from our people, culture, policies and corporate legal structure to our products, processes and verticals are timelessly sustainable.

How We Differentiate

Backed by ESG RE's design and asset management verticals, the fund ensures each financed asset is fully optimized across sustainability and economic KPIs. Our debt pricing model seamlessly integrates your sustainability commitment. The stronger the environmental, social, and governance profile of your asset, the more favorable your financial, cost of capital and investment outcome. We underwrite ESG as a performance driver, not just a risk mitigant. With built-in design support, post-close asset management and independent certification our capital does more than fund your deal – it strengthens your asset, your position and your outcomes.

Proven Value Outcomes

- **600%+ ROI** combined return on investment from ESG RE verticals
- **$3-10M plus** in actual net capital savings per project
- **6-10% annual NOI increases** from optimized cap stacks, operational efficiency and industry average green rent premiums
- **Up to 49% reduction in equity risk exposure** via enhanced coverage ratios
- **Asset value uplift from 6-11%** from sustainable building measures
- **Payback period under 1 year** for integrated ESG upgrades

Built for Green & Traditional Operators Alike

Our fund is designed for institutional users who see ESG as strategic advantage, not just a compliance checkbox. Whether you're pursuing LEED Platinum, or a conventional player, owner/operator exploring how sustainability can drive better results – we meet you where you are:

For sustainability-minded developers: We underwrite ESG as a source of better performance, offering better pricing, lower risk, and increased asset value.

For traditional sponsors: We leverage your unique positioning to help you cost-effectively implement high-impact ESG performance that enhance your investment case without deviating from your strategy or comprising returns.

What Makes Us Different

- **Preferential debt pricing** tied to asset-level sustainability improvements
- **Coverage across the full lifecycle** for new developments, major retrofits, and stabilized buildings
- **All project types and asset classes** from multifamily, office, industrial, mixed-use and more
- **Direct IRR and equity multiple improvements** quantified and proven
- **And Yes** 100% certified to the highest standards by Pre Impact

Fund | Design | Market | AM

Why Our Equity Strategy Stands Apart

Each asset undergoes a full-stack ESG transformation – zero carbon operations, supply chain measurement, health and safety, climate resilience, embodied carbon metrics and verified ESG ratings. Backed by our verticals, the ability to incorporate sustainable performance from planning throughout construction and occupancy is seamless, affordable and unmatched throughout the asset's whole lifecycle.

Institutional returns with ESG Alpha: Our equity thesis centers on material financial value creation through targeted ESG interventions.

High-performance ESG Execution: We invest in assets where sustainability integration materially improves performance, not just optics. Each project undergoes a full-stack upgrade.

A Few Essentials We Deliver

- **IRR and equity multiple gains** from cap stacks throughout the asset's lifecycle
- **Substantial coverage ratio uplift** that de-risks LP and GP equity
- **Annual OpEx savings** and **heightened NOI uplift** per asset
- **600%+ ROI** from embedded ESG measures
- **Certified?** Yes to the highest standards by Pre Impact

ESG RE

Design

Modular High Performance Building Design

At ESG RE, design is not a soft feature – it's building performance that translates directly into a financial engine. Our Design vertical delivers high-performance ESG architecture that's cost-effective and unmatched in sustainable building quality that decisively improves value at every layer of the capital stacks. From net zero, passive principles, and carbon smart materials to social performance, measured health and safety, commissioning and much more, each project is planned and built to outperform – financially, sustainably and architecturally.

Design Engineering That Delivers Across The Table

ESG RE Design isn't aesthetic fluff or engineering jargon. It's a strategic tool that drives asset-level returns and portfolio-wide performance. Our method enhances - not replaces – architecture and engineering. ESG RE Design overlays smart, data-driven sustainability principles that simplify high-performance building execution without compromising its quality, improves capital efficiency, streamlines the commissioning process and unlocks sustainable building alpha.

Whether you're planning ground-up development, repositioning a stabilized asset, or managing a national portfolio, our design method builds in what matters most: resilience, performance, and return – automatically

No guesswork, No greenwashing. Just better buildings, built to perform.

Our method works

- **For developers:** improves entitlement, lease-up, underwriting, and exit risk
- **For architects:** delivers sustainable buildings smarter, faster and more measurably than legacy models-without sacrificing timelines or architectural intent
- **For AEC:** executes building commissioning seamlessly with less risk exposure and automatically incorporates value chain impacts
- **For cap partners:** de-risks equity position , enhances coverage and unlocks great returns
- **For owners/operators:** future proofs the asset, mitigates risk, streamlines reporting, compliance and tenant/buyer satisfaction while quantifying overall asset value appreciation
- **For portfolios:** provides repeatable ESG performance at scale

Continuous Intelligence from Funding Through Operation

ESG RE Asset Management is where long-term value is realized and sustained. Leveraging the intelligence and structure delivered through our Fund, Design and Marketing verticals, we ensure every asset – new or existing – operates at peak performance throughout its lifecycle. By connecting pre-development, cap improvement and financial modeling with real-time building operations, we go beyond sustainable asset management, reduce lifetime operational costs, and seamlessly align each asset's value with long-term capital and performance goals. With seamless continuity from early-stage to post-occupancy, our verticals simplify ESG execution, strengthen operational control and future-proof both the asset and its investment profile.

Lifecycle Optimization. Future-Proofed Performance

Built on the foundations of our Fund and Design verticals, ESG RE AM ensures every asset we touch is conditioned for long-term operational excellence. From construction through hold to exit, we embed renowned, data-backed asset management principles that drive profitability, compliance, and cap alignment throughout the asset lifecycle.

Whether you're managing a single core-plus asset or a multi-market portfolio, ESG RE Asset Management guarantees your building doesn't just perform – it outperforms. This is operational ESG RE AM excellence…built for returns, resilience and results beyond market standards.

The ESG RE Lifecycle Advantage

- **Future-Proofs Risk, Compliance & ESG Alignment:** Stay ahead of regulatory shifts, LP mandates and disclosures
- **Ensures Commissioning and AEC Accountability:** From new builds to existing retrofits we model, validate and outperform
- **Reduces Lifecycle Costs & Enhances Operational KPI's:** Drive NOI growth, extend asset life and reduce OpEx – even in older properties
- **Enables Smarter, More Proactive Operations:** Data-backed operational choices lead to better outcomes and faster
- **BMS Dashboard Ready:** Performance intelligence connects seamlessly into operations, whether during lease-up or retrofitted asset
- **Aligns ESG with Exit Strategy:** Prepare assets for stronger valuations, better buyer fit, and reduced disposition friction

Data Integration

We deliver a fully integrated solution for developers and investment teams through end-to-end campaign execution. Our method intuitively blends powerful data platforms, automated workflows and real-time reporting. Giving you full visibility and measurable performance throughout the asset's full lifecycle . With a 24/7 birds eye view of campaign metrics, lead progression and conversion analytics we're seamlessly able to monitor lead velocity, pre-leasing benchmarks and capital marketing ROI.

What we deliver

- **Strategic positioning:** Market insights and brand strategy that reflect your vision and speak directly to investors, stakeholders and buyers
- **End-to-End campaign execution:** Seamless digital campaigns from land acquisition buzz to stabilized occupancy
- **Targeted lead generation:** Hyper-targeted outreach to qualified prospects
- **Asset-specific marketing:** Custom strategies and tools tailored to commercial, mixed-use, multifamily and investment-grade developments

Predictive Targeting

With the unified data infrastructure in place, all marketing touchpoints – web, ads, CRM, content and outreach are fully integrated. Using AI, an ultra-efficient predicted targeting and segmentation is modeled instantaneously by analyzing user behavior, historical conversion patterns and market trends – resulting in hyper-targeted audience segments that ensures your message reaches the most likely buyers, at the idealistic time.

What it delivers

- **Lead generation performance:** Much higher conversion rates from to digital to ultra-qualified leads
- **Project leasing and sales acceleration:** Beyond fast absorption rate with integrated digital + CRM strategy
- **Investor and buyer engagement:** Greatly enhanced click through rate translating to actual sales funnel
- **Real-time visibility:** Laser-focused funnel reporting across all assets and phases

AI Optimization

The tech-backed and AI-powered audience is now hyper aligned, segmented and as accurate as it gets; however, this is where tech cannot replace human oversite, experience and industry know-how. The marketing channels are then dynamically tested and optimized using real-time feedback loops and with careful strategic and branding oversite, AI adapts messaging and creative to maximize engagement and minimize spend. The outcome is smarter campaigns and faster results.

How we measure results

High-stakes performance: Proven strategies that are designed to influence real business outcomes that matter to developers and investors

- **Lead Generation:** 10.5% (vs. 3.7%. Industry average)
- **Stabilization:** 5-9 months faster (vs, market benchmarks)
- **Pre-Leasing:** 30-60% faster absorption rate
- **Lease-Up:** 33% higher tenant conversion
- **Spend:** Up to 62% lower cost per acquisition

CRM Sync

With data-driven by hyper-performance design the battery behind market-leading results is well-charged and continuously ready to perform. The final step is intelligent lead scoring, routing and prioritizing. Machine learning spotlights high-intent leads based upon engagement signals and profiling. Automatic CRM routing ensures clearer client relations, smoother follow-ups and higher sales conversions. In turn, the outcome is informed and actionable visibility into channel performance, audience behavior and ROI.

How we manage performance

Our AI-augment stack: Capture attention, convert it into real momentum and bring efficient clarity to your high-value sale's process

- **Full Funnel Reporting:** From site visits to signed leases and capital commitments across all assets and phases
- **Predictive Lead Scoring & Routing:** 60%+ match rate between high-score leads and closed deals
- **Campaign Optimization Cycling:** Informed pivots every 14-days, maximizing real-time performance signals, effectiveness and efficiency
